

FEATURES

XCAP VERSIONS

The XCAP-Lite version provides access to PIXCI® imaging board(s) and can also load, view, and save images and image sequences to/from files, while PIXCI® imaging board(s) are present and open for use. XCAP-Lite also exports customized video formats and camera serial commands to assist programming PIXCI® imaging boards via the XCLIB "C" library. For imaging boards capturing directly into host computer memory, XCAP-Lite is limited to 64 MBytes of frame buffer memory; no limitation on frame buffer memory when used with the PIXCI® CL3SD or PIXCI® SI2. XCAP-Lite is provided with each PIXCI® imaging board.

The XCAP-Ltd version provides access to PIXCI® imaging board(s) and includes all features of the -Lite version, adding graphics, load/save images and image sequences in additional formats, and more image viewer and convenience features. XCAP-Ltd can load, view, and save single images and image sequences even when the PIXCI® imaging board(s) are not present. XCAP-Ltd supports full access to as much as 4 GBytes of frame buffer memory under 32 bit systems, and is limited to 8 GByte of frame buffer memory under 64 bit systems.²

The XCAP-Std version provides access to PIXCI® imaging board(s) and includes all features of the -Ltd version, also enabling use of all image processing, measurement, graphics, load/save, image viewer, and analysis features. XCAP-Std can load, view, analyze, and save pre-existing images and image sequences even when the PIXCI® imaging board(s) are not present. XCAP-Std supports full access to as much as 4 GBytes of frame buffer memory under 32 bit systems, and to as much as 16 EByte of frame buffer memory under 64 bit systems.³

The XCAP-Viewer version allows loading and viewing single images and image sequences from files, such as those saved by XCAP-Lite, XCAP-Ltd, or XCAP-Std. XCAP-Viewer also allows browsing the hundreds of processing, measurement, analysis, load/save, and graphics features that can be applied to images and allows browsing XCAP's integrated camera controls.

INTEGRATED CAMERA CONTROLS

Built-in, camera-specific, on-screen graphical controls for selected cameras that are configured via RS-232, I²C, or Camera Link, integrate the camera's controls within XCAP! No need to also run the camera manufacturer's software - both PIXCI® imaging board and camera can be configured together!

For selected cameras configured by physical switch settings, XCAP provides an on-screen virtual camera and switches - setting the on-screen switches to match the physical switches easily configures the PIXCI® imaging board to match the camera!

For cameras controlled by hardwired signals via the PIXCI® frame grabber, XCAP provides a convenient graphical user interface.

Provides integrated camera controls for Adimec, Allied Vision, Atmel, Basler, Baumer, CIS, CMOS Sensor, Cohu, Dalsa, Dalstar, E2V, FLIR, Hamamatsu, Hitachi, Ikegami, Imperx, Indigo, Intevac, ISVI, Jai, Mikrotron, NED, PCO AG, Perkin Elmer, Point Grey, Princeton Instruments, Pulnix (Jai), Raptor Photonics, Reticon, Salvador Imaging, Sensors Unlimited, Sentech, Silicon Imaging, SILICON VIDEO®, Sony, Takenaka, Thomson/Thales, Toshiba Teli, Uniq Vision, Vieworks, and many other cameras. See the complete list of integrated camera controls at www.epixinc.com/guide/index.htm.

GENERIC CAMERA LINK CONFIGURATION

Use any Camera Link camera, combined with a Camera Link style PIXCI® imaging board⁴, even when XCAP doesn't provide camera specific controls. An easy to use graphical interface configures XCAP and PIXCI® imaging board for the camera's resolution, bit depth, color space, etc. Use the camera manufacturer's software for control of the camera via serial commands, or directly enter serial commands into XCAP's 'terminal' dialog.

MULTIPLE FORMAT VIDEO CAPTURE⁵

Capture from any video source supported by a PIXCI® imaging board: area scan, line scan, high resolution, high frame rate cameras; with digital or analog output; in monochrome or color; with 8, 10, 12, or more bits per monochrome pixel or color pixel component value.

Control the capture window, undersampling, and reconfigurable frame buffers. Capture from multiple cameras with multiple imaging boards.

Provides video rate image sequence capture, triggered event acquisition, continuous (circular) sequence acquisition until terminated by trigger event, video recording to memory, video recording to disk,⁶ live recursive or FIFO averaging, and live merge of RGB filtered monochrome images into color. Allows trigger on TTL signal, time of day, mouse, or video time code.

SOFTWARE TEST DRIVE: Have a PIXCI® imaging board with older software? Download XCAP from www.epixinc.com to see the newest XCAP solution.

View the camera compatibility list? Download XCAP-Viewer and click **PIXCI®, PIXCI® Camera Info**. Click under **Adjust Dialog** to see the built-in controls for your camera!

Don't yet have a PIXCI® imaging board? Download XCAP-Viewer and peruse its windows and features. (Many features, other than perusal and image display requires either a PIXCI® imaging board, or use of the XCAP-Ltd or -Std versions).

Peruse the full manual? Download XCAP-Viewer and click **Help, XCAP Reference Manual**.

SPECIFICATIONS

IMAGING DEVICES:

Supports any PIXCI® A, A310, D, D24, D32, D2X, D3X, CL1, CL2, CL3SD, E1, E1DB, E4, E4DB, E8, E8DB, EB1, EB1-PoCL, EC1, ECB1, ECB1-34, ECB2, EL1, EL1DB, ELS2, SI, SI1, SI2, SI4, SV2, SV3, SV4, SV5, or SV7 series imaging board.⁷

Up to eight (32 bit O.S.) or sixteen (64 bit O.S.) identical PIXCI® series imaging boards can be operated simultaneously.⁸ XCAP-Std version also allows operating up to four non-identical PIXCI® imaging boards.

Supports up to eight (32 bit O.S.) or sixteen (64 bit O.S.) SILICON VIDEO® 1281M, 1281C, 1310, 1310C, 2112, 2112C, 5C10, 5M10, 642M, 642C, 643M, 643C, 9C10, 9M001, 9M001C, 9T001C, 10C6, 10M6, 10C-CL, 10M-CL, WGA-C, or WGA-M cameras.

The XCAP-Std version allows capturing from TWAIN compatible devices (Windows only). The XCAP-Ltd and -Std versions also provide image load, save, process, analysis, and graphics features without a PIXCI® imaging board present.

OPERATING SYSTEM:

For Windows 95, 98, and ME, as a 32 bit, multi-threaded, application.

For Windows NT (V4.0), 2000, XP, Vista, and 7 as a 32 bit, multi-threaded, application.

For Windows XP(x64), Vista(x64), and 7(x64) as a 64 bit, multi-threaded, application.

For Linux (kernel V2.4.8 or later) on Intel 80x86.

For Linux (kernel V2.6 or later) on Intel x86-64.

REQUIREMENTS:

Processor/Memory - Intel Pentium or newer processor and 32-64 MBytes of memory exclusive of user-requested in-memory image buffers, operating system, and other software.

Graphics Display - Windows: Minimum: Windows compatible S/PGA w. 16 bits per pixel. Suggested: ACP or PCI Express S/PGA w. 24 or 32 bits per pixel.

Linux: Graphics display system (S/PGA) supporting TrueColor or DirectColor mode. Video display rate depends upon video format, S/PGA card, S/PGA mode, and motherboard speed and bandwidth.⁹

Mouse - A Windows or Linux compatible mouse is required.

Printer - Image and graphics printing on any Windows or Linux compatible printer. Special support for high-quality printing on Hewlett-Packard PCL4 and PCL5 compatible printers, IBM 4019 Laser-Printer, Cal-Comp PlotMaster, and Alden 9315 printers.

Disk Space - Approximately 140 megabytes, exclusive of stored images and reports.

Other - The XCAP-Ltd and -Std versions use a USB¹⁰ authorization key, or a key on the parallel port which may be shared with a printer.

SOFTWARE INCLUDES:

Browsable reference manual. Printed reference manual included with XCAP-Std and -Ltd; optionally available for XCAP-Lite.

1. Features dependent upon hardware options, or upon a specific version of the PIXCI® imaging card, function only in conjunction with required hardware.

2,3. The maximum available computer based frame buffer memory is also limited by the computer hardware, configuration, and operating systems.

4. The PIXCI® CL3SD and CL1 are customized for one, or a group of similar, cameras and can't be used as a generic Camera Link imaging card.

5. Support for various video formats, resolution, triggering and other features are dependent upon specific version(s) of the PIXCI® imaging card, and are effective only in conjunction with required hardware.

6. Frame rate is dependent upon host PC hardware and disk drive(s).

7. Software may require upgrade to operate future versions of the PIXCI® imaging board. PIXCI® SV2 and SV3 are not supported under 64 bit Windows or Linux.

8. Each functional half of a PIXCI® E1DB, E4DB, E8DB, ECB2, EL1DB, ELS2, SI2, or SV7, or each functional quarter of a PIXCI® SI4, counts as one board.

9. Contact EPIX, Inc. for suggested S/PGA cards which support full video rate display in conjunction with a specific PIXCI® imaging board.

10. Requires O.S. with support for USB devices.

FEATURES

Notes: (A) For -Lite, the imaging board is assumed installed and open for use, otherwise -Lite provides the same features as -Viewer. (C) For -Lite and -Viewer, images may not be loaded directly from an Internet URL, or saved directly to an FTP URL. (E) A combination of the characteristics of PIXCI® imaging cards, operating systems, and of software. The PIXCI® CL3SD and SI2 have on-board frame buffer memory, other PIXCI® imaging cards use computer based frame buffer memory. The PIXCI® CL1, CL2, D, D24, D32, D2X, D3X, SI, SV2, SV3, SV4, and SV5 are designed to access up to 4 GB of computer memory. The PIXCI® A310, E1, E1DB, E4, E4DB, E8, E8DB, EB1, EB1-PoCL, EC1, ECB1, ECB1-34, ECB2, EL1, EL1DB, ELS2, SI1, SI4, and SV7 are designed to access up to 16 EByte of computer memory (a theoretical limit, as no currently available PC provides 16 EByte of memory). For -Lite, a maximum of 64 MByte of computer based frame buffer memory is supported. On 32 bit systems, -Std and XCAP-Ltd support up to 4 GBytes of computer based frame buffer memory. On 64 bit systems, XCAP-Std supports up to 16 EByte of computer based frame buffer memory; XCAP-Ltd supports up to 8 GByte of computer based frame buffer memory. The maximum available computer based frame buffer memory is also limited by the computer hardware, configuration, and memory needed by the operating system. (F) Camera specific controls provided for cameras supported by PIXCI® ELS2, SI, SI1, SI2, and SI4, and for most digital cameras supported by PIXCI® CL1, CL2, CL3SD, D, D24, D32, D2X, D3X, E1, E1DB, E4, E4DB, E8, E8DB, EB1, EB1-PoCL, EC1, ECB1, ECB1-34, ECB2, EL1, and EL1DB: the PIXCI® Camera Info feature shows the specific, customized, support provided for each camera. (G) For -Lite and -Viewer, the View, Palette feature does not include save, load, import, or export, nor the "Extract Bright/Dark Reference" features. (H) For -Lite and -Viewer, the Examine, Pixel Peek feature does not include save. (I) For -Lite and -Viewer, plotting features do not include statistics, save, or export options. For -Viewer, plotting features do not include printing. (J) For -Ltd, -Lite, and -Viewer, the Modify, Set feature does not include non-rectangular regions. (K) For -Ltd, -Lite, and -Viewer, the Measure features do not include calibration. (L) For -Ltd, -Lite, and -Viewer, the Line Profile is limited to straight lines. (M) Subject to the amount of frame buffer memory versus image resolution yielding more than one frame buffer. (N) For Bayer output digital color cameras with software providing white balance and color corrections. The -Lite provides automatic, continuous, white balance only for SILICON VIDEO® cameras. The -Lite does not provide custom color calibration from a Macbeth chart or other color reference. (O) Software implemented AGC/AEC is provided for selected cameras: of those, -Lite provides AGC/AEC only for SILICON VIDEO® cameras. (P) For -Lite, the Sequence Capture does not include the time stamp feature, nor the strobe features added by software (as selected in the Sequence Capture dialog): any strobe features provided by the PIXCI® imaging board or camera (either inherent or selected in the Capture & Adjust dialog) are available. (Q) For -Lite, the "triggered" sequence capture is provided when the camera is being triggered (often referred to as "Async Reset Mode"): sequence capture from a free-running camera where the trigger or event is handled separately is not provided. (R) For -Lite, the image printing feature supports only the operating system's built-in image printing feature(s), not printing via EPIX® imaging drivers. (S) For -Lite and -Viewer, plotting features do not include save or export options. For -Viewer, plotting features do not include printing. (T) For -Lite, the sequence capture to virtual memory is limited to using 1 GByte of virtual memory For -Ltd, the sequence capture to virtual memory is limited to using 4 GByte of virtual memory. The operating system's configuration may impose additional limitations. (U) Interactive control of the lens is provided, but not automatic aperture or automatic focus features. (V) Software implemented pixel normalization is provided for SILICON VIDEO® and other selected cameras: of those, -Lite does not provide pixel normalization in generic Camera Link mode. (W95) Feature available only under Windows 95, 98, and ME. (Win) Feature available only under Windows.

Driver Assistant - Windows NT, 2000, XP, XP(x64), Vista, Vista(x64), 7, 7(x64). Driver Assistant - Windows Common. Driver Assistant - Linux. Driver Assistant - Advanced Options. PIXCI® - Advanced. PIXCI® - Video Setup. Video Setup - Format. Video Setup - Resolution. Video Setup - Sync. PIXCI® - Export & Import Video Setup. PIXCI® - Status. PIXCI® - Connections. PIXCI® - Serial Terminal. PIXCI® - TWAIN Sourcery and Image-Pro Sourcery. Sourcery - Activation. Sourcery - Acquisition. Sourcery - Suggestions.

Image Viewer Window - File. Image File - Save. TIFF Format. JPEG/JFIF Format. BMP Format. FITS Format. PCX Format. Targa (TGA) Format. XY Binary Format. XY ASCII Format. Image File - Save Sequence. AVI Format. Image File - E-Mail. Image File - Load. TIFF Format. JPEG/JFIF Format. BMP Format. AVI Format. FITS Format. XY Binary Format. XY ASCII Format. Image File - Load Sequence. Image File - Print. Print via EPIX® Imaging Drivers. Image File - Attributes. Image File - Duplicate. Copy Image Buffer. Copy as Shown. Image File - BlackBoard.

Image Viewer Window - View. Image View - Palette. Palette - Display. Palette - Modify - Numerical & Mouse. Palette - Modify - Black & Gain. Palette - Modify - Band Coloring. Palette - Modify - Bit Slice. Palette - Modify - Bit Transposition. Palette - Modify - White Balance. Palette - File. Image View - Sequence Play. Image View - Sequence Thumbnails. Image View - Cursor. Image View - Display. Display - Resize. Display - API. Display - Palette. Display - Window. Display - Status Bar. Image View - Zoom, Pan, Scroll. Image View - Shortcuts.

Image Viewer Window - Examine. Image Examination - Pixel Peek. Image Examination - Pixel Peek & Poke. Image Examination - Pixel Plot. Image Examination - Pixel Plot 3D. Image Examination - SMPTE VITC.

Image Viewer Window - Modify. Image Processing - Patterns. 2-D Periodic Patterns. More 2-D Periodic Patterns. Alignment Patterns. User-Defined. Random. Image Processing - Sequence Patterns. Image Processing - Set Pixels. Image Processing - Sequence Set Pixels. Image Processing - Pixel Arithmetic. Image Processing - Sequence Pixel Arithmetic. Image Processing - Src+Dst Pixel Arithmetic.

Image Processing - Binning. Image Processing - Sequence Binning. Image Processing - Src+Dst Binning. Image Processing - Contrast Modification. Contrast Stretching. Contrast Inversion. Histogram Equalization. Image Processing - Sequence Contrast Modification. Image Processing - Src+Dst Contrast Modification. Image Processing - Convolution. Image Processing - Sequence Convolution. Image Processing - Src+Dst Convolution. Image Processing - Correlation Map. Image Processing - Sequence Correlation Map. Image Processing - Src+Dst Correlation Map. Image Processing - Edge Detection. Magnitude Filters. Edge Gradient Filters. Image Processing - Sequence Edge Detection. Image Processing - Src+Dst Edge Detection. Image Processing - Interlace & Flicker. Image Processing - Sequence Interlace & Flicker. Image Processing - Src+Dst Interlace & Flicker. Image Processing - Morphology. Erosion, Dilation, Open, Close, etc.. Skeletons and Thinning. Numeric Results. Image Processing - Sequence Morphology. Image Processing - Src+Dst Morphology. Image Processing - Noise Generator. Image Processing - Sequence Noise Generator. Image Processing - Src+Dst Noise Generator. Image Processing - Normalization. Image Processing - Sequence Normalization. Image Processing - Src+Dst Normalization. Image Processing - Rotation & Shift. Image Processing - Sequence Rotation & Shift. Image Processing - Src+Dst Rotation & Shift. Image Processing - Spatial Filtering. Image Processing - Sequence Spatial Filtering. Image Processing - Src+Dst Spatial Filtering. Image Processing - Spatial Normalization. Image Processing - Sequence Spatial Normalization. Image Processing - Src+Dst Spatial Normalization. Image Processing - Threshold. Image Processing - Sequence Threshold. Image Processing - Src+Dst Threshold. Image Processing - Threshold Adaptive. Image Processing - Sequence Threshold Adaptive. Image Processing - Src+Dst Threshold Adaptive. Image Processing - Warping. Image Processing - Sequence Warp. Image Processing - Src+Dst Warp. Image Processing - Copy. Image Processing - Pair Arithmetic. Image Processing - Sequence Pair Arithmetic. Image Processing - Src+Dst Pair Arithmetic. Image Processing - Pair Normalization. Image Processing - Sequence Pair Normalization. Image Processing - Src+Dst Pair Normalization. Image Processing - Triplet Normalization. Image Processing - Sequence Triplet Normalization. Image Processing - Src+Dst Triplet Normalization. Image Processing - Average Sequence. Image Processing - Difference Sequence. Image Processing - Tile Sequence.

Image Viewer Window - Measure. Image Measurement - Intensity Calibration. Calibration - Reference Values. Calibration - Explicit Expression. Calibration - Disable. Calibration - Save & Load. Image Measurement - Spatial Calibration. Image Measurement - Histogram. Image Measurement - Histogram Pair. Image Measurement - Mass & Moments. Image Measurement - Line Profile. Image Measurement - Radial Mass Plot. Image Measurement - Shape Analysis. Region Selection. Results. Image Measurement - Blob Analysis. Setup - Segmentation. Setup - Analysis. Customize - Derived. Customize - Constraints. Customize - Ordering. Customize - Report. Show - Results, Summary. Show - Results, One. Show - Results, List. File - Save Summary Stats. File - Save Blob Stats. File - Copy Blob Stats to Black Board. File - Copy Blob Stats to Clipboard. Image Measurement - Particle Tracking. Track Individual Particles by Motion Extrapolation and Verification throughout Sequence Method. Fuzzy Evaluation of all Vectors in each Image Pair for Group Consistency Method. Track Individual Particles by Nearest Neighbor in each Image Pair Method. Setup - Analysis. Show - Results, One. Show - Results, List. Customize - Report. File - Save Track Coordinates. File - Copy Track Coordinates to Black Board. File - Copy Track Coordinates to Clipboard. Example. Image Measurement - Sub-Pixel Edger. Tool Shape. Options. Results. Image Measurement - Distance & Angle Crosshairs. Distance & Angle Crosshairs - Operate. Distance & Angle Crosshairs - Calibrate. Distance & Angle Crosshairs - Options. Image Measurement - Correlation Finder. Correlation Options. Results. Image Measurement - Ellipse Fitter. Setup. Results. Image Measurement - Overlays. Graphic Ruler. Graphic Protractor. Graphic Cartesian Reticle. Graphic Polar Reticle.

Image Viewer Window - Draw. Draw - Graphic Objects. Graphic Annulus. Graphic Annulus Arc. Graphic Arrow. Graphic Bezier Curve. Graphic Bezier Region. Graphic Circle. Graphic Circle Arc. Graphic Ellipse. Graphic Ellipse Arc. Graphic Elliptical Annulus. Graphic Elliptical Annulus Arc. Graphic Rectangular Frame. Graphic Line. Graphic Parallel Lines. Graphic Path Curve. Graphic Path Enclosed. Graphic Point. Graphic Points. Graphic Polygon. Graphic Polyline. Graphic Rectangle. Graphic Rectangle Array. Graphic Text. Graphic Window. Draw - Image Overlay. Draw - Paint Brush. Paint Brush - Pattern. Paint Brush - Foreground & Background. Paint Brush - Shape. Draw - Paint Fill. Graphic Manager. File - New Graphic. File - Save Graphic. File - Load Graphic. File - Export Graphic. File - Import Graphic. File - Duplicate Graphic. File - Delete Graphic. File - Exit. Graphic - List.

Image Viewer Window - Aoi. Aoi - Set Area of Interest. Aoi - Set Region of Interest. AOI/ROI Manager.

PIXCI® Image Viewer Window. File - Save/Load Frame Buffer Memory. File - Image Attributes. Capture - Live Options. Capture - Shortcuts. Capture - Adjustments. Adjust - Common Features. Adjust - Common Preset Features. Adjust - Common Camera Control Features. Adjust - Common Automatic Gain/Exposure Control (AGC) Features.

Adjust - Common Color and White Balance Features. Adjust - Common Gain & Offset Normalization Features. Adjust - More Common Features. Adjust - PIXCI® CL1, CL2, CL3SD, D, D24, D32, D2X, D3X, E1, E1DB, E4, E4DB, E8, E8DB, EB1, EB1-PoCL, EC1, EC81, EC81-34, ECB2, EL1, EL1DB, ELS2, SI, S11, S12, and S14 - Common Digital Area Scan Camera Features. Adjust - PIXCI® CL1, CL2, CL3SD, D, D24, D32, D2X, D3X, E1, E1DB, E4, E4DB, E8, E8DB, EB1, EB1-PoCL, EC1, EC81, EC81-34, ECB2, EL1, EL1DB, ELS2, SI, S11, S12, and S14 - Common Digital Line Scan Camera Features. Adjust - PIXCI® CL1, CL2, CL3SD, D, D24, D32, D2X, D3X, E1, E1DB, E4, E4DB, E8, E8DB, EB1, EB1-PoCL, EC1, EC81, EC81-34, ECB2, EL1, EL1DB, ELS2, SI, S11, S12, and S14 - Digital Camera Specifications. Adjust - PIXCI® CL1, CL2, CL3SD, D, D24, D32, D2X, D3X, E1, E1DB, E4, E4DB, E8, E8DB, EB1, EB1-PoCL, EC1, EC81, EC81-34, ECB2, EL1, EL1DB, ELS2, SI, S11, S12, and S14 - Notes. Adjust - PIXCI® CL3SD/E4 for Basler A504K, A504K. Adjust - PIXCI® D2X for SILICON VIDEO® 1281M, 1281C. Adjust - PIXCI® D2X for SILICON VIDEO® 1310, 1310C. Adjust - PIXCI® D2X for SILICON VIDEO® 2112, 2112C. Adjust - PIXCI® SI, S11, S12, and S14 for SILICON VIDEO® 5M10, 5C10. Adjust - PIXCI® SI for SILICON VIDEO® 642M, 642C. Adjust - PIXCI® S11, S12, S14 for SILICON VIDEO® 643M, 643C. Adjust - PIXCI® SI, S11, S12, and S14 for SILICON VIDEO® 9C10. Adjust - PIXCI® SI, S11, S12, and S14 for SILICON VIDEO® 9M001, 9M001C. Adjust - PIXCI® SI, S11, S12, and S14 for SILICON VIDEO® 9T001C. Adjust - PIXCI® EB1-PoCL, SI, S11, S12, and S14 for SILICON VIDEO® 10C6, 10M6, 10C-CL, 10M-CL. Adjust - PIXCI® SI, S11, S12, and S14 for SILICON VIDEO® WGA-C, WGA-M. Adjust - PIXCI® SV2, SV3, SV4, SV5, SV5A, SV5B, SV5L. Adjust - PIXCI® SV2, SV3, SV4, SV5, SV5A, SV5B, SV5L - Analog Camera Specifications. Adjust - PIXCI® SV2, SV3, SV4, SV5, SV5A, SV5B, SV5L - Integration Features. Adjust - PIXCI® SV7.
